EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney Usha Parker (Reg. No. 61,939) on April 30, 2009.

The application has been amended as follows amendment on 03/02/09:

Claim 4 has been canceled.

Please amend the claim 1 as follows:

1. **(Twice Amended)** A light detecting apparatus comprising:

an optical fiber probe whose distal end faces a surface that it measures the probe forming a spot of light on said surface and detecting light from said surface for measurement; and

a probe controller that switches the light detection apparatus between broad range measurement mode and high resolution measurement mode by controlling a distance between the distal end of said optical fiber probe and said surface for measurement based on said distance correlated to the value of the diameter of a light radiating aperture formed centrally of the distal end of a core of said optical fiber probe,

wherein said broad range measurement mode exploits the light propagated through a core of said optical fiber probe and said high resolution

measurement mode exploits near-field light seeping from said core of said optical fiber probe.

The following is an examiner's statement of reasons for allowance:

Claims 1, 3, 6-13, 15-16, and 18-24 are allowed.

Claims 2, 4-5 and 14, and 17 have been canceled.
